

Kickoff

The Lean Inception starts with a kick-off, followed by a sequence of intense activities, and ends with a workshop showcase. The team directly involved with the initiative must participate in all activities; the other interested parties must participate in the kick-off and the showcase, where the expectations and results obtained in the workshop are presented, respectively.

Think big, start small, learn fast!

- 1** Ask the main sponsor of the initiative to open the Lean Inception with a speech about the initiative to be worked on.

- 2** Make a brief presentation about the Lean Inception agenda and the concept of MVP.

- 3** Ask everyone to write their names, using the color that identifies the level of participation.

Agenda

Parking-lot

The Parking Lot helps to momentarily park conversations, ideas or questions that are raised during a conversation but are not useful for discussion at that specific time. It is an essential tool for the facilitator at any time during the workshop, as it is a polite way of saying: "yes, I heard you, but this conversation is for later".

Glossary

Take advantage of the Lean Inception to validate, adjust and give visibility to the vocabulary of the domain. It is very important that everyone involved - business, technology and user representatives - communicate and register the generated artifacts with a common language. Make sure to check the understanding of each word in the domain, and place it in the Glossary, visible to everyone.

Grupo de Estudio

- Conjunto de 2 a 8 estudiantes que se organizan para estudiar una materia o tema específico de forma colaborativa, pudiendo ser presencial, online o híbrido.

Matching

- Proceso automático o manual de conectar estudiantes con intereses, horarios o preferencias de estudio compatibles para formar grupos eficaces.

Perfil Académico

- Conjunto de informaciones de usuario que inclui cursos, módulos, módulos de interesse, nível de conhecimentos, horários disponíveis e preferências de estudo (presencial/online).

Sessão de Estudo

- Encontro agendado de grupo com data, hora, duração, local físico ou virtual e tópicos específicos a serem estudados durante aquela reunião.

Activity 1: Product Vision

THE PRODUCT VISION

For: **estudantes e instituições de ensino** ,

whose: **precisam formar grupos de estudo eficazes** it needs to be solved ,

the: **StudyBud dy** product , is a: **plataforma digital de conexão** category.

that: **facilita a criação e gestão de grupos de estudo colaborativos** key reason to buy it .

Different from: **redes sociais genéricas ou fóruns** competitor alternative ,

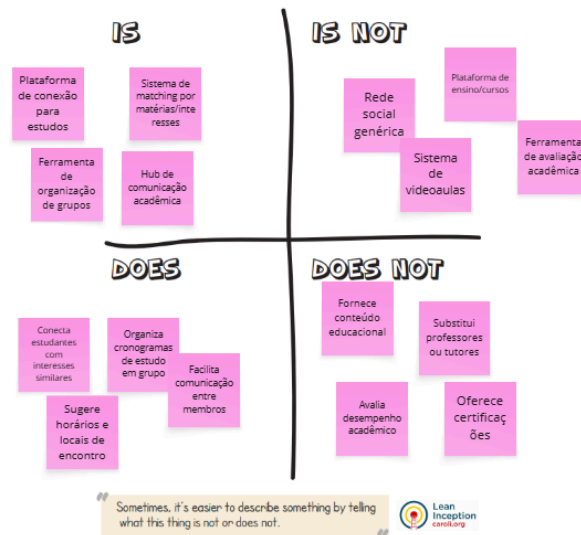

our product: **oferece ferramentas específicas para a organização de estudos e matching inteligente de estudantes acadêmicos** difference .

Fill in the blanks marked with post-its in your color.

Somehow between this idea and the launching, the product vision helps to trace the initial path.

Activity 9: MVP Canvas

MVP CANVAS

SEGMENTED PERSONAS Who is this MVP for? Can we segment and test this MVP in a smaller group? - Estudantes universitários - Concurseiros - Estudantes técnicos	MVP PROPOSAL What's the Proposal for this MVP? Facilitar a formação de grupos de estudo eficazes através de matching inteligente e ferramentas de organização.	EXPECTED RESULT What learning or result we are seeking in this MVP? - Taxa de matching efetivo - Frequência de uso - Satisfação com grupos formados
JOURNEYS What journeys are going to be improved with this MVP? Jornada Principal - Ana: Cadastro → Perfil → Busca Local → Solicita Grupo → Encontro Presencial → Sessão Recorrente Jornada Principal - Carlos: Descoberta → Cadastro → Busca Online → Entrada em Grupo → Sessão Virtual → Uso Recorrente	FEATURES What are we building in this MVP? Which actions are going to be simplified or improved in this MVP? - Cadastro e perfil - Criação/busca de grupos - Chat básico - Calendário simples	METRICS TO VALIDATE THE BUSINESS HYPOTHESES How can we measure the results of this MVP? - Número de usuários ativos - Grupos criados vs. grupos ativos - Taxa de retenção mensal
	COST & SCHEDULE What is the expected cost and due date of this MVP? When can we look at the data for validating it? Is there any schedule constraints? - 12 semanas total - €8.200K orçamento - 8 pessoas na equipe - 70% custos de desenvolvimento	

Do not waste time, money and effort creating the wrong product. Validate your idea and build your MVP!
